

Hardware Funda Workshop and Introduction to Linux

The school of Computing Science & Engineering has organised a workshop on “Hardware Funda Workshop and Introduction to Linux”. The workshop was on 15th January 2016 at Block C. Registration done by technojam student team also information shared to students by mail. There were 150 students from different schools participated in the workshop. The subject matter dealt with in the workshop was the salient features of hardware and LINUX, the Free and Open Source Software. Linux is the most preferred operating system for mobile phones, tablet computers, network routers and video games, and is used by 95% of the world’s fastest supercomputers. The workshop was very informative and interesting for the participants. They have shown much interest in the hands on sessions.
